Summary

Highly curious about internal workings of things; as of now **working for Singtel Singapore client** and has received **appreciations for the work**. Personally working on **creating a custom Reactive framework** for handling the http requests and responses along with the proper filter chains and cleaning to provide a structured way to create reactive applications.

Experience

NCSI Technologies

April 2023 – Present

Java Developer

Pune, India

- Received **client and director appreciations** for technical excellence and leadership within 5 months
- Led Prepaid Division as pioneer developer**; mentored new team members across projects; Drove multiple critical projects with **consistent high-quality deliverables**
- Reduced 90% manual processes** by system improvements in filtering out incorrect SIM User validation

Synechron Technologies

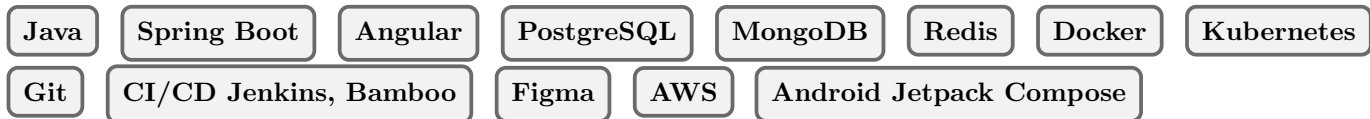

Dec 2022 – Mar 2023

Intern

Pune, India

- Built mock ERP system using Java Spring Framework for enterprise application experience

Technical Skills

Projects

Hi App, [Singtel, Singapore] | Spring Boot, AWS, EKS, ECS, Helm

- Migrated to reactive programming and implemented BFF layer** for microservices architecture
- Optimized batch processing** with custom DMF flow architecture
- Led **technical improvements across Prepaid Division** projects
- Handling the entire sdic from **development till deployment** and **support for production** dev related bugs and failures.

Custom Reactive Framework | Spring Boot, Webflux, Reactor Core

- Creating a custom Reactive framework** for properly managing the HTTP requests and responses along with proper filter chains
- Facilitate **Clean code architecture** by reducing the need to specify the controllers, mappings, and specs
- Request/Response filters**, **Custom middlewares** to add interceptors to reduce the need to modify handler implementations, **Dynamic request mappings** using externalized path configurations

NCS CSR Projects | Angular, Spring Boot, Figma, Tailwind CSS, Docker, PostgreSQL

- Developed two key enterprise applications: **Time Log Tracker** and **Visitor Management System**, reducing **manual overhead by 70-90%**
- Implemented user-friendly UI/UX with RESTful APIs, containerized architecture, and automated workflows to enhance operational efficiency.

Collection of Utilities | Python, Spring Boot, MongoDB, Git, Docker, Batch Scripting, Selenium

- Designed and deployed utilities for **clipboard monitoring**, **Git automation**, **Docker backup**, and **automated email communication**, **saving 80% of personal time** spent on repetitive tasks.

Education

Dhole Patil College of Engineering, Pune

June 2018 – July 2022

Bachelor of Engineering in Information Technology

Pune, India

- CGPA: 7.98/10
